

eyeLock®

myris™

The most convenient and secure way to authenticate your identity.

Forget usernames and passwords

Never type a password again—myris is a USB powered Iris Identity Authenticator™ that grants you access to your digital world. It's portable, lightweight, fits in the palm of your hand—and is as easy as looking in a mirror.

myris uses patented technology to convert your individual iris characteristics to a code unique only to you, then matches your encrypted code to grant access to your computers, websites, applications and data—all in seconds.

Dimensions:

Depth: 1.18in (30mm)
Diameter: 3in (78mm)
Weight: 3.2oz

myris works easily with digital networks, including online accounts, social media accounts, Internet VPNs, email and more. On the back end, you can set passwords as complex as you like. Once you link myris, you can forget them. Use myris to secure workstations, high-value transactions, critical databases, information systems for enterprise and small business and more.

As with all EyeLock identity authentication solutions, when you purchase myris you also receive our enrollment and iris-matching software. For enterprise customers, you can upgrade your product offering by utilizing EyeLock's robust SDK to integrate seamlessly with digital platform environments.

eyeLock®

myris™

No more usernames.
No more passwords.*
